***Abstract**\_This research aims to develop a proposal for developing the management of student activities at Mansoura University to harmonize between the university education outputs and labor market requirements. To gather the necessary data and information the descriptive approach was used.*

*A questionnaire was administered to all the faculty members who supervised the activities in all the faculties of the Mansoura University. (115) questionnaires were subject to statistical analysis. Results showed that the reality of student activities management was low, with an average of (1.546) while the reality of achieving the activities of harmonization between the outputs of university education and labor market requirements was moderate with an average of (1.895).*

*Finally, results revealed the consent of the majority of the sample subjects – to a high degree- to the proposed mechanisms for the development of management activities to harmonize university education outputs and labor market requirements with average of (2.371) degrees. The research presented a suggested proposal to develop student activities management at Mansoura University in order to achieve harmony with the requirements of labor market.*
