

A PROGRAM BASED ON E-LEARNING MANAGEMENT
SYSTEM (BLACK BOARD) FOR THE TREATMENT OF
COMMON LINGUISTIC ERRORS IN WRITING
EDUCATIONAL RESEARCH AND THE DEVELOPMENT OF
E- COMMUNICATION SKILLS FOR COLLEGE
EDUCATION GRADUATE STUDENTS

Ahmed Goma Ahmed Ibrahim

Assistant professor of curriculum and teaching Arabic

College Education in Tafahna Alashraf- Alazhar University

***Abstract-** This research aimed at treating the common linguistic errors in writing and development of E-communication skills for college education graduate students by a program based on E- Learning Management System (black board). To achieve this aim the researcher selected common linguistic errors in writing (grammar, dictation, style) for college education graduate students (master- PH.D) by analyzing some plans submitted by students. And also prepare common linguistic errors diagnostic test in writing and applied to a sample of graduate students. Then, the researcher prepared a program based on E- learning management system (black board) using wikis to treat these errors. Also the researcher prepared achievement test in writing skills and a measure for E- communication and applied it before and after the program on sample research. After ending from the application of the tools The results have proved that: There were statistically significant differences between the mean scores of(control & experimental) groups in post application of writing skills test and e- communication measure favoring experimental group. In the light of results the researcher presents some recommendations and suggestions.*

Key words: E-learning– linguistic errors – graduate studies.
