

GLOBALIZATION AND ITS INTERNAL AND EXTERNAL CHALLENGES TO EDUCATION: REASONS & SOLUTIONS

Abstract_ *This study aims at shedding light on globalization: its definition and its challenges to the educational process in its both internal and external levels.*

The study also aims at finding solutions to face these challenges. The researcher adopted a review of literature that is related to the main subject of the study. The study concludes the following:

- The educational globalization means having control and authority over curriculum which results in the melting of the individuality and identity in the name of technological development and therefore the dominance of the values of the western world.

- Moreover, the study reveals the internal challenges of globalization with regard to education; of these challenges comes the absence of active positive role of the teacher.

- Finally, the study recommends the following measures as solutions to face the challenges that encounter education. For in stance, the enforcement of religious creed, strengthening the importance of the Arabic language as a guard for both Arabic culture and identity and updating the educational curriculum.

Key words: *Challenges of globalization, educational globalization, education and identity enforcement, religious identity, cultural awareness and globalization.*
