**ABSTRACT\_** *The study aimed to identify the transformation requirements towards the application of e-governance in some women's colleges at King Khalid University from the standpoint of administrative leadership, and to identify the obstacles (administrative and organizational - and financial -walguenih -oalepeshrah) facing the shift towards application of e-governance in some women's colleges at King Khalid University from the standpoint of administrative leadership. And examine the implications of the differences between the averages of the sample members used responses about the requirements and constraints of the shift towards application of e-governance, according to some demographic variables (educational qualification, years of experience, functional level). It was used descriptive analytical method and a sample of the study (101) of administrative leaders in some women's colleges at King Khalid University. The results showed that the most important requirement is achieved by an average of (96%) and came in first place from the perspective of the administrative leadership of the shift towards the application of e Husbandry is (to provide the necessary information and documents over the Internet to accomplish administrative tasks as soon as possible). As well as the disabled (control bureaucracy patterns on the management system) obtained a high rate of (89.1%) came in first place in the regulatory and administrative constraints item, the results also demonstrated the lack of statistically significant differences between the averages of the sample used for members of the responses about the requirements and constraints of the transition towards the application of electronic management, according to some demographic variables (educational qualification, years of experience, functional level), and then put some important recommendations.*

**KEY WORDS:** *Electronic management, E- management quirements, E-management obstacles.*
