

# PERCEPTIONS OF KING KHALID UNIVERSITY STUDENTS ABOUT QUALITY OF UNIVERSITY TEACHING

**ABDALRAHMAN S. A. ALQAHTANY**  
**King Khalid University**

***ABSTRACT**\_University education in the kingdom of Saudi Arabia aims to achieve three main objectives, university teaching, scientific research, and the community service and its development. To attain the first objective, the student must be provided with humanitarian and scientific Knowledge regarding scientific specialization, developing scientific thinking, improving teaching skills and best practice of it as well as developing his (positive) trends. The university teacher is regarded as a prompter to scientific knowledge, they never communicate with their students and his relationship with them lacks the Basis of discussion, however, the kingdom of Saudi Arabia tries hard to operate at international levels of quality to achieve academic accreditation. The researcher mainly used the "the descriptive approach". This approach has been used in the detection of levels of teaching quality at King Khalid University, from the viewpoint of its students. Average score that expressing the student's perceptions at King Khalid University about the quality of university teaching, through the question naires as a whole, are below average, this reflects their demilitarization of the quality of university teaching provided to the min some respects.*

**KEY WORDS:** Total Quality in Education.
