***ABSTRACT** \_This study aims to shed light on the family problems of the youths of Tabuk from the viewpoint of the male and female students of Tabuk University in order to identify the appropriate solution to these problems from the perspective of Islamic education. Hence, the researcher follows the descriptive methodology. To obtain the study's goal, the researcher uses a developed and reviewed questionnaire that includes 75 questions for 903 male and female students from Tabuk University. The researcher concludes from study results that a high percentage of the youths with the average of 3.47 feels that their parents treat them in a bad manner and one of the causes of these problems is the violence within the family with the average of 3.00 and then the bad education from the parents with the average of 2.90. The research recommends to intensify the seminars and workshops that help the families to learn the ideal way to treat youths and satisfy their needs for love and family affiliation.*
